-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over European patent 608430 cited by applicant in IDS dated October 27, 2003.

3. EP'430 in claim 14 on page 24 discloses a cold rolled steel sheet having an analogous alloy composition, and is processed in substantially the same manner as claimed by applicant. Note EP'430 in claim 14 teaches hot rolling with a finishing temperature of at least Ar3-100C (overlaps claimed temperature of 800C or more), coiling at 800C or less (same as claimed coiling temperature of 800C or less), cold rolling, and annealing at ferrite/austenite transformation point to Ac3 (within claimed ferrite-austenite 2-phase region which is equivalent to Ac1 to Ac3 points). Moreover, note the EP'430 process in Example 5 on page 20 further teaches after annealing, to cool at an average rate of 60C/sec (within the claimed range of 10 to 300c/sec).

4. Since the steps of prior art and present invention process are essentially the same with overlapping temperature and cooling rate ranges, and the alloy composition has the same constituents with overlapping wt% ranges, then a prima facie case of obviousness is established because it would have been obvious to one of ordinary skill in the art to select the claimed limitation ranges from the broader disclosure of the prior

art because the prior art has the same utility (cold rolled steel sheet for automobile structural parts) and similar properties of high strength and r-value.

5. With respect to claim 20, EP'430 in claim 14 on page 24 discloses a steel composition containing small amounts of Cr, B, and Ti.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah Yee whose telephone number is 571-272-1253. The examiner can normally be reached on Monday-Friday from 6:00 to 2:30.
